Border Crossings

Total International Entries

In June 2007, total international border crossings (including U.S. and overseas visitors) to Ontario declined by 6.9% to just under 2 million crossings, about 145,000 fewer visitors than in June 2006.

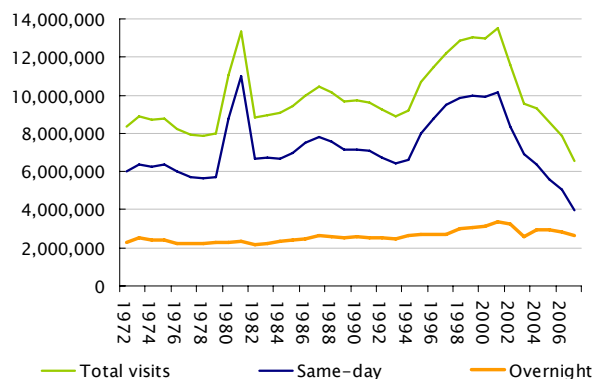

Over the first half of 2007, international border crossings to Ontario were down by 15.0% over the same period last year.

U.S. Entries

During the month of June 2007, U.S. border crossings to Ontario fell by 8.1% over 2006.

For the first six months of 2007, U.S. border crossings into Ontario were down by 16.4% over the same period of 2006 – 51% fewer entries for the period than in 2001, the peak year for U.S. border crossings during the period.

U.S. Border Crossings to Ontario, Jan - June

During the month of June 2007, same-day U.S. entries to Ontario were down by 13.7% over 2006, while overnight entries were down by just 1.5%. During this period, overnight travel by auto increased by 0.4% and overnight non-auto travel declined by 6.3% over 2006.

In June 2007, commercial air travel¹ from the U.S. to Ontario was down 9.5% over June 2006. Over the first six months of 2007, commercial air travel was down 9.6% over the same period in 2006.

¹ Commercial air travel represents 97% of all air travel.

In the first half of 2007, there were 3.9 million same-day U.S. entries to Ontario, a decrease of 21.9% (or 1.1 million entries) from the same period in 2006. Overnight entries, which totalled 2.6 million for the period, were down 6.6% (or approx. 185,000 entries) over the same period in 2006.

Compared to other provinces, Ontario experienced a larger decline in June 2007 and over the first half of 2007 over 2006.

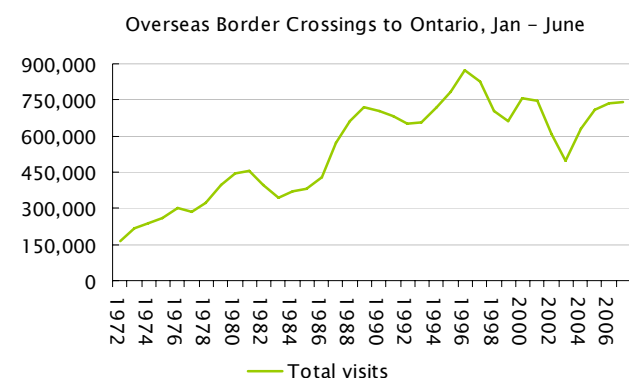

Province	U.S. Entries June 2007 over 2006		U.S. Entries, YTD: Jan - June 2007 over 2006	
	Entries*	% change	Entries*	% change
Ontario	1,738,897	-8.1%	6,569,265	-16.4%
B.C.	624,664	-1.6%	2,226,310	-4.3%
Quebec	264,288	-4.4%	1,083,413	-10.6%
Canada	3,034,207	-6.0%	11,164,938	-12.7%

Source: Statistics Canada

Overseas Entries

In June 2007, overseas border crossings to Ontario increased by 3.9% over 2006.

In the first six months of 2007, overseas border crossings have increased by 0.3% over the same period in 2006.

In June, direct entries to Ontario from overseas countries were up by 6.1% over June 2007, while entries to Ontario via the U.S. were down by 1.4%.

In the first six months of 2007, direct entries to Ontario were up by 1.9% over 2006, while entries via the U.S. were down 3.2%.

In June 2007, while Ontario experienced a moderate increase in overseas border crossings, British Columbia and Quebec experienced more notable increases.

In the first six months of 2007, Ontario saw only negligible growth in its overseas border crossings while BC and Quebec have seen strong growth.

Province	Overseas Entries, June 2007 over 2006		Overseas Entries, YTD: Jan - June 2007 over 2006	
	Entries*	% change	Entries*	% change
Ontario	217,442	+3.9%	740,090	+0.3%
B.C.	188,776	+4.7%	666,636	+3.8%
Quebec	90,695	+9.7%	323,837	+7.6%
Canada	559,837	+5.9%	1,938,949	+3.9%

Source: Statistics Canada

Overseas Entries: Traditional Markets

In June 2007, Ontario saw decreases in visits from two of its four primary overseas markets – Japan and France – while the U.K. showed a small increase in visitors and Germany posted a notable increase.

Over the first half of 2007, only Germany posted an increase over the same period in 2006.

Market	June 2007 over 2006		YTD: Jan - June 2007 over 2006	
	Entries*	% change	Entries*	% change
U.K.	43,499	+2.1%	150,575	-0.6%
Germany	12,909	+10.1%	45,446	+1.5%
Japan	10,435	-25.5%	44,964	-21.3%
France	7,089	-5.3%	24,899	-7.2%

Source: Statistics Canada

*Arrivals (or border crossings) are an estimate of Ontario's total visits and understate the actual number of visits from these markets, since a number of them visit Ontario but enter Canada through a non-Ontario port.

Overseas Entries: Emerging Markets

A broader set of emerging markets continues to change the composition of Ontario's international visitors. During June 2007, significant growth was seen in the number of entries from China, Mexico, India and Brazil compared to June 2006.

In the first six months of 2007, six of the markets listed have seen growth over the same period in 2006.

Market	June 2007 over 2006		YTD: Jan - June 2007 over 2006	
	Entries*	% change	Entries*	% change
Mexico	11,400	+19.6 %	41,436	+12.5%
India	7,996	+15.0%	27,248	+9.8%
South Korea	6,403	-13.3%	25,331	+4.1%
Brazil	5,801	+15.0%	23,827	-1.9%
Israel	5,415	-15.2%	22,859	-15.3%
China	6,263	+25.7%	20,462	+21.4%
Australia	5,429	+2.6%	18,200	+1.7%
Netherlands	5,717	+4.3%	17,062	+0.1%
Italy	5,437	+5.1%	17,408	+7.9%
Hong Kong	4,633	+7.0%	15,021	-2.1%

Outbound Travel

Travel by Ontarians to international destinations increased by 6.0% in June 2007 over 2006.

Travel to the U.S. increased by 6.5%, while travel to overseas countries increased by 2.6%.

In the first six months of 2007, outbound travel by Ontarians has grown by 2.2%, with growth in travel to overseas countries (5.3%) outpacing growth in travel to the U.S. (1.7%).

Accommodation

The occupancy rate at Ontario hotels in June 2007 was 72.0%, up 2.1 percentage points over 2006. Across the province, occupancy was highest in downtown Toronto (83.9%), downtown Ottawa (82.3%), Ottawa West (80.6%) and Niagara Falls (77.7%). Of these, Ottawa West and downtown Toronto posted notable increases over the previous year (increases of 7.2 and 5.9 percentage points, respectively).

For the first six months of 2007, the occupancy rates at Ontario hotels averaged 59.9%, a decrease of 0.4 of a percentage point over 2006 – still below 2001 levels for the same period.

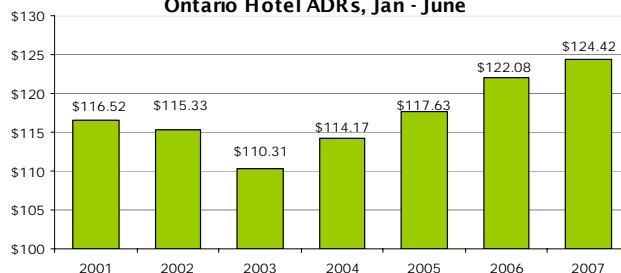

Ontario Hotel Occupancy Rates, Jan - June

The average daily rate (ADR) in Ontario increased by 4.7% in June 2007 to \$131.74, with downtown Toronto (\$185.73), Niagara Falls (\$149.93) and downtown Ottawa (\$147.99) achieving the highest ADRs for the month, followed by Kingston (\$130.22). Many locations experienced notable increases in ADR, the most significant being Ottawa West (7.5%), Kingston (7.1%) and downtown Toronto (7.0%).

The ADR in Ontario for the first six months of the year increased 1.9% to \$124.42. All regions, except Windsor and Central Ontario, have seen increases in the first half of the year. The biggest gains can be seen in Hamilton/Brantford (7.8%), Ottawa East (6.5%), Kingston (5.3%) and Sault Ste. Marie (5.3%).

Ontario Hotel ADRs, Jan - June

Revenue per available room (revPAR) in June 2007 increased considerably (7.8%) over 2006, resulting in moderate revPAR growth (1.3%) over the first half of 2007 over 2006.

There is significant variability across the regions, with Hamilton/ Brantford (10.0%) and Ottawa East and West (10.4% and 8.7%) showing considerable growth, while Windsor (-14.1%) and Central Ontario (-11.8%) experienced significant declines in their revPAR over the period.

Canadian Air Carriers Data

Overall passenger traffic on Air Canada's mainline, measured in revenue-passenger miles (RPMs), increased by 1.1% in June 2007 over 2006. Meanwhile, Jazz saw an increase of 13.1% in passenger traffic.

In the first six months of 2007, overall passenger traffic for Air Canada and Jazz combined increased by 3.9% over the same period of 2006.

Passenger traffic growth continued for WestJet in June 2007 with a 21% gain over June 2006, and a 21% increase in overall traffic in the first half of 2007 over 2006.

Economic Indicators

Consumer Confidence

The national consumer confidence index fell to 98.1 in June 2007 (2002=100), a drop of 0.9 points over the previous month. Increased optimism about current and future financial conditions was more than offset by reduced confidence about future job prospects, making consumers less comfortable with making major purchases.

Atlantic Canada posted another strong gain of 5.3 points (following a 3.6 point increase in May), while Ontario posted an increase of 1.7 after posting declines in the past two months. In Quebec, the index was down 2.7 points, while the Prairies and British Columbia also posted declines (-5.4 and 2.6 points, respectively.)

Source: The Conference Board of Canada

The U.S. Consumer Confidence Index, which had bounced back in May, was down in June to stand at 103.9 (1985=100), down 4.6 points over the previous month.

Source: The Conference Board (U.S.)

Labour Force

Employment in Canada was up in June 2007, after two months of little change. The national unemployment rate, however, remained at 6.1% for the fifth consecutive month as more people entered the labour force. Since June 2006, employment was up by 2.0% with the economy adding 336,500 jobs.

Ontario's employment continued to grow more slowly than the national average as employment growth in various service sectors failed to offset declines in manufacturing. Employment was up only 0.9% (59,700 jobs) over the past 12 months. In June 2007, Ontario's unemployment rate increased 0.2 percentage points to 6.5%.

In June, employment in Ontario's tourism-related industries increased by 0.9% over the previous month. Employment was up by 11.9% over June 2006 across the sector, with more people employed in performing arts companies, traveller accommodations and other amusement and recreation industries.

Source: Statistics Canada, Labour Force Survey, Ontario Ministry of Tourism

Bankruptcies

In June 2007, there were 2,866 bankruptcies in Ontario. Of these, 221 were businesses while the rest were consumers. Bankruptcies were down marginally (0.2%) over June 2006.

Of the business bankruptcies reported in June 2007 in Ontario, 21 were in accommodation and food services and 5 were in the arts, entertainment and recreation sector. In June 2006, there were 21 and 3 bankruptcies recorded in these sectors, respectively.

Consumer Response Indicators

1-800-ONTARIO

There were approximately 34,000 calls to the 1-800-ONTARIO call centre in June 2007, an increase of 12% over June 2006. The first half of 2007 has seen a 9% increase in calls over the same period in 2006.

Source: Electronic Data Systems

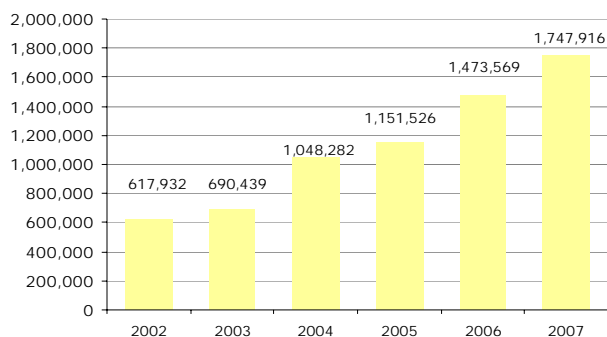

OntarioTravel.net

In June 2007, there were more than 350,000 user sessions on Ontario's travel website **ontariotravel.net**, a decrease of 5% over June 2006. User sessions of the main website increased by 1%, while sessions on the seasonal site decreased by 25%.

User sessions over the first six months of 2007 remain strong, with an increase of 19% over the same period in 2006. Traffic on the main site is up 15%, while traffic on the seasonal site is up 38%.

Attendance at Agencies

The following table shows the percentage change in total visits at Ontario agencies for both June 2007 over June 2006 and year-to-date 2007 over 2006.

Agency	June 2007 over 2006	YTD: Jan - June 2007 over 2006
Royal Ontario Museum ²	+177.2%	+23.1%
Ontario Science Centre	+11.6%	-32.1%
Science North	+6.5%	-5.1%
Art Gallery of Ontario	-40.3%	-18.9%
McMichael Art Gallery	-3.6%	+17.8%
Ontario Heritage Trust ³	+18.9%	+27.4%
Ontario Place	-18.4%	-19.1%
Huronian Historical Park	-7.1%	-5.4%
Upper Canada Village	+6.3%	+9.8%
Fort Henry	+2.3%	+1.7%

² Spike in attendance resulting from events surrounding the opening of the Michael Lee-Chin Crystal on June 1-2, 2007).

³ The Ontario Heritage Trust includes: Fulford Place, Elgin & Winter Garden and Uncle Tom's Cabin.

APPENDIX: BACKGROUND

2005 Statistics

- There were 19.3 million U.S. visits to Ontario in 2005, a decrease of 9.6% over 2004. Spending by U.S. visitors amounted to \$3.9 billion, a decrease of 10.6% over 2004.
 - Visits from the border states, which made up 82% of all U.S. visits, decreased by 10.7% while visits from other states decreased by 7.5% over 2004.
 - Same-day visits, which make up 63% of all U.S. visits, decreased by 13.3% while overnight visits were down by 3.3% over 2004.
- There were 2.2 million overseas visits to Ontario in 2005, a 6.0% increase over 2004. Spending by overseas visitors amounted to \$2.5 billion, an increase of 6.6% over 2004.
 - Visits from Ontario's traditional markets (the U.K., Japan, Germany and France), which make up 42% of all overseas visits, increased by 2.2% while visits from other travel markets increased by 8.9% over 2004.

NOTE: What about domestic travellers to Ontario?

Domestic travel accounts for about 75% of all person visits to Ontario, and more than 60% of tourism receipts in the province, however, information concerning domestic travel for 2005 **is not yet available**.

In 2005, the Canadian Travel Survey (CTS) which provided information on domestic travel was replaced by the Travel Survey of Residents of Canada (TSRC). The TSRC will offer some significant benefits over its predecessor, including filtering in tourism trips while filtering out routine trips, focusing on decision makers (respondents must be 18+ yrs rather than 15+) and ensuring that all jurisdictions are using a common metric. The change to the TSRC means that 2005 will be the new baseline year, resulting in a delay in reporting on domestic travel results for 2005 as a basis comparable to previous years.

It is anticipated that domestic travel data for 2005 and 2006 will be available by the end of 2007. Statistics Canada is also developing a procedure to restate data prior to 2005, to enable historical comparisons. In the interim, only travel data for the U.S. and overseas travel markets for 2005 will be provided.

2004 Statistics

Overall Results

- Ontario had Canada's largest tourism industry in 2004, accounting for 42% of Canada's visitors and 33% of Canada's tourism revenues.
- The total number of visitors to Ontario in 2004 was 118.3 million (up 3% over 2003), while visitor spending was \$17.1 billion (up 8% over 2003).
- The total tourism receipts in Ontario in 2004 reached \$21.4 billion, an 8% increase over 2003.

Number of Visitors

- Overseas visitors to Ontario in 2004 increased by 32% over 2003 to 2.0 million while U.S. visitors to Ontario decreased by 3% over 2003 to 21.4 million.
- Domestic visitors to Ontario in 2004 increased by 4% over 2003 to 94.8 million.
- Ontarians' outbound travel to international destinations in 2004 increased by 5% over 2003 to 21.0 million.

Visitor Spending

- Spending by overseas visitors in Ontario amounted to \$2.3 billion in 2004, a 30% increase over 2003. Spending by U.S. visitors in Ontario amounted to \$4.4 billion, an 11% increase over the previous year.
- Visitor spending by domestic visitors to Ontario reached \$10.4 billion in 2004, a 3% increase over 2003 while tourism receipts by domestic visitors in Ontario increased by 5% over the previous year to \$14.7 billion. (The difference between visitor spending and tourism receipts is Ontarians' spending on Canadian transportation carriers for travel to destinations outside of Ontario but within Canada. Visitor spending describes the economic importance of inbound travel to the economy while tourism receipts describe the importance of the whole tourism industry to the economy.)
- Ontario's tourism industry is extremely diverse. Its businesses are predominantly small to medium-sized. In 2004, there were 161,850 businesses in tourism-related sectors in Ontario, a 3% increase over 2003. These businesses represented 19% of the total number of businesses in the province.

For more historical Ontario tourism statistics, please visit <http://www.tourism.gov.on.ca/english/tourdiv/research/trends.html>.

Economic Impact of Tourism in 2004

- In 2004, tourism was Ontario's 7th largest generator of foreign exchange, following Transportation Equipment, Machinery, Chemical Products, Computer & Electronic Products, Primary Metals, and Plastics and Rubber Products Manufacturing. Tourism generated \$6.7 billion in foreign exchange for the province.
- In 2004, tourism Gross Domestic Product (GDP)⁴ in Ontario was \$11.6 billion. This means that 2.2% of the provincial economy was directly attributable to the value added of the tourism industry.
- Tourism GDP in Ontario was greater than that of the agriculture, forestry/logging, commercial fishing/hunting and mining industries combined in 2004.
- The total contribution of tourism to the provincial GDP⁵ (direct, indirect and induced) amounted to \$20.4 billion in 2004.
- In 2004, tourism employment⁶ in Ontario reached 213,500 jobs, accounting for 3.3% of Ontario's total employment. Tourism was the 14th largest industry in the province in terms of employment.
- This is the break-down of the 213,500 tourism jobs by sector:
 - 50,015 jobs in Accommodations
 - 54,060 jobs in Food & Beverage services
 - 21,345 in Recreation and Entertainment
 - 32,625 in Transportation
 - 25,090 in Retail
 - 16,900 in Travel Services
 - 2,315 in Car Rental and
 - 11,150 in other service sectors

⁴ Gross Domestic Product (GDP): Value of goods and services produced by labour and capital located within a country (or region), regardless of nationality of labour or ownership. This GDP is measured at market prices. Tourism GDP refers to the GDP generated in those businesses that directly produce or provide goods and services for travelers.

⁵ The total contribution of tourism to the provincial GDP includes: tourism GDP, indirect GDP (the GDP generated from the expansion of demand from tourism-related businesses to other businesses or sectors) plus induced GDP (the GDP associated with the re-spending of labour income and /or profits earned in the industries that serve travellers directly and indirectly).

⁶ Tourism employment: The full-time, part-time and seasonal jobs, as well as both employed and self-employed jobs in those tourism-related businesses that directly produce or provide goods and services for travelers.

- Total contribution of tourism to the employment in the province⁷ (direct, indirect and induced) reached 322,600 jobs in 2004.
- In 2004, tax revenues from tourism⁸ for all three levels of government in Ontario reached \$5.8 billion – 3.2 billion in federal tax revenues, \$2.4 billion in provincial and \$198 million in municipal tax revenues⁹.
- For every dollar of tourism receipts in Ontario in 2004, all three levels of governments received 27.0 cents in tax revenues directly, of which federal government received 14.9 cents, provincial government 11.2 cents and municipal governments 1 cent.
- The total contribution of tourism to tax revenues¹⁰ (direct, indirect and induced) for all three levels of government amounted to \$9.2 billion in 2004.

For more information on the economic impact of tourism in Ontario, please visit <http://www.tourism.gov.on.ca/english/tourdiv/research/trends.html>

⁷ Total contribution of tourism to the employment in the province: Includes tourism employment, indirect employment (the jobs generated from the expansion of demand from travellers to other businesses or sectors) plus induced employment (the jobs associated with the re-spending of labour income and /or profits earned in the industries that serve travellers directly and indirectly).

⁸ Tax revenue from tourism: refers to the personal, corporate, commodity and other taxes generated in those businesses that directly produce or provide goods and services for travelers

⁹ Federal tax revenues: refers to personal income tax, corporate income tax, commodity tax (GST, gas tax, excise tax, duty tax, air tax and trading profits) and payroll deduction that collected by the federal government.

Provincial tax revenues: refers to personal income tax, corporate income tax, commodity tax (PST, gas tax, gallon tax, amusement tax and trading profits) and employer health tax that collected by Ontario provincial government.

Municipal tax revenues: refers to business and personal property taxes that collected by the municipalities.

¹⁰ The total contribution to tax revenue of tourism: Includes tax revenue from tourism, indirect tax revenues (the tax revenues generated from the expansion of demand from travellers to other businesses or sectors) plus induced tax revenues (the tax revenues associated with the re-spending of labour income and /or profits earned in the industries that serve travellers directly and indirectly).
